

Air Mattress Safety

Pressure relieving mattress that inflates with air. Helps to prevent pressure sores for patients who cannot get out of bed.

Do not use oil based skin creams as these can soak into the covers of the air mattress

Do not smoke whilst using your air mattress or oxygen therapy

Turn off your oxygen when not in use

Do not lay heated objects onto your air mattress, such as hair dryers or straighteners

Do not use electric blankets while using an air mattress

Do not burn candles in a room with oxygen or an air mattress

Do not use lighters or matches near to oxygen or an air mattress

If in doubt contact your Healthcare Professional
